

1. What is a Smart Resume Parser?
2. What is the main objective of your project?
3. Why did you choose this project?
4. What problem does your project solve?
5. How is your project useful for recruiters?
6. What are the key features of your system?
7. What technologies are used in your project?
8. Why did you choose Python for this project?
9. What is Natural Language Processing (NLP)?
10. How is NLP used in your project?
11. How do you extract text from PDF files?
12. How do you extract text from DOCX files?
13. What is PyMuPDF and why is it used?
14. What is the role of the docx library?
15. What challenges did you face while extracting text?
16. How do you handle different resume formats?
17. How do you deal with encoding issues?
18. What happens if the PDF is scanned (image-based)?
19. How do you ensure accurate text extraction?
20. What preprocessing steps do you apply to extracted text?
21. What is tokenization?
22. What is lemmatization?
23. Difference between stemming and lemmatization?
24. What is Named Entity Recognition (NER)?
25. How does spaCy help in your project?
26. What entities do you extract using spaCy?
27. How do you identify sections like skills and education?
28. What are stop words and why are they removed?
29. What is POS tagging?
30. How do you clean noisy text?
31. What is regex and how is it used?

32. How do you extract emails and phone numbers?
33. How do you identify skills in a resume?
34. How do you detect work experience?
35. How do you extract education details?
36. How do you handle missing or incomplete data?
37. How do you deal with duplicate information?
38. How do you structure extracted data?
39. What format is used for output?
40. Why did you choose JSON/CSV formats?
41. What is the workflow of your project?
42. How does the system process a resume step-by-step?
43. How do you design the architecture of your project?
44. How do you ensure scalability of your system?
45. How can your project be improved?
46. Why did you use Streamlit?
47. How does the user interface work?
48. How can users upload resumes in your system?
49. How are results displayed to the user?
50. How did you deploy your project?
